1 November 1973

MEMORANDUM FOR: DDI Information Processing Coordinator

SUBJECT   :   ADP Project Priorities

REFERENCE   :   Your Memorandum of 25 October 1973,
                         Same Subject

1. The ranking of OBGI ADP projects is complicated by the fact that several of them serve other components of the Agency and the Intelligence Community. Our ranking in these cases reflects subjective judgement. Project BIRST is not included below because it is an OJCS file retrieval program used only occasionally by Geography Division to retrieve target information from the BLIP file.

2. a. Priority One

CARTREX........Map production for COMIREX. Daily operational and periodic summary graphics

CARTOMAP......Map production other than exclusively COMIREX. Comprehensive cartographic service in support of all parts of the Agency and Intelligence Community.

CARTBANK......Management of files of geographic points to be used in plotting maps. World Data Bank I and II are products used nationally.

b. **Priority Two**

DATMAP.........Integrated Map Library Program
utilized in accessioning, reporting,
and cataloging maps. Catalog
cards, accessions lists, indexes
and procurement want lists are
produced periodically. AEGIS
system is used to query this file.

CARTPROD.......Cartography Division Management
Information System that maintains
production records and generates
catalogs and file records.

GEOSIG..........Management of geographic files
derived from the Special Intelligence
Graphic.

c. **Priority Three**

CARTDEV.........Cartography Division development
account.

GEODEV..........Geography Division development
account.
